

Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A communication control method for controlling wireless data communication conducted between a portable information communication terminal and a data communication apparatus via a communication network including a radio communication network, said communication control method comprising the steps of:

determining whether wireless data communication between a portable information communication terminal and a data communication apparatus has been interrupted by disconnection of a communication line; and

in response to normal termination of data communication between a ~~portable~~the portable information communication terminal and a ~~data~~the data communication apparatus, clearing accounting on said data communication that was interrupted between said portable information communication terminal and a ~~data~~said data communication apparatus by disconnection of a ~~communications~~said communication line if said interrupted data communication was interrupted within a predetermined time before the normal termination of ~~the~~ data communication.

2. – 4. (canceled)

5. (currently amended) A communication control system for controlling wireless data communication conducted between a portable information communication terminal and a data communication apparatus via a communication network including a radio communication network, said communication control system comprising:

a communication situation control section for determining whether wireless data communication between a portable information communication terminal and a data communication apparatus has been interrupted by disconnection of a communication line; and

an accounting calculation section responsive to normal termination of data communication between ~~a portable~~said portable information communication terminal and ~~a data~~said data communication apparatus, for clearing accounting on said data communication that was interrupted between said portable information communication terminal and ~~a data~~said communication apparatus by disconnection of ~~a communication~~said communication line if said interrupted data communication was interrupted within a predetermined time before the normal termination of the data communication.

6.- 8. (canceled)

9. (currently amended) A storage medium containing a program that makes a computer function as a communication control system for controlling wireless data

communication conducted between a portable information communication terminal and a data communication apparatus via a communication network including a radio communication network, said program when executed making the computer function as:

a communication situation control section for determining whether wireless data communication between a portable information communication terminal and a data communication apparatus has been interrupted by disconnection of a communication line; and

an accounting calculation section responsive to normal termination of data communication between a ~~portable~~said portable information communication terminal and a ~~data~~said data communication apparatus, for clearing accounting on said data communication that was interrupted between said portable information communication terminal and a ~~data~~said data communication apparatus by disconnection of a ~~communication~~said communication line if said interrupted data communication was interrupted within a predetermined time before the normal termination of ~~the~~ data communication.

10. – 12. (canceled)
